## 1 Register for ZooMonitor at ZooMonitor.org

ZooMonitor offers three different types of accounts. All accounts provide the same functionality and allow you to create un-limited projects and add multiple users.

ZooMonitor Account Types:

- **Accredited Organization**—for ac-credited zoos, aquariums, sanctuaries, and museums. Basic institutional li-cense (<3 GB storage space) is free!

- **Non-Accredited Organization**—a shared institutional license for any organization not affiliated with an approved accrediting body.

- **Individual**—a personal license not affiliated with an organization, typical-ly for researchers at large academic or laboratory institutions.

Register for ZooMonitor

Begin by selecting a plan below.
Already have an account with ZooMonitor? To change your current plan, go to the app's **Admin** page.

FREE		
Accredited Organization	Non-Accredited Organization	Individual
For an accredited Zoo, Aquarium, Sanctuary or Museum	For all non-accredited organizations	For individual projects (e.g. students, individual researchers)
View qualifying accreditation organizations	Learn more about this plan	Learn more about this plan

Click here to view the list of qualifying accrediting organizations.

## 2 Sign In and Download the App

- After registering, you will re-ceive a Getting Started email within 14 days.

- Click Sign In at the top of the ZooMonitor homepage, click Download the App, and then enter your 12-character license key from the bottom of your Getting Started email.

Note: ZooMonitor works on any tablet or computer using the Chrome or Safari web browsers.

Confirm Password

CREATE

3b Add Observers

Observers can log into the app and record data on projects they've been added to by Admin Users. Note: Observers won't appear in the App sign-in menu until you've downloaded updates (See Step 5 below).

### Create Observer

Full Name:
Name ...

✓ Active (Only active observers can record observations or studies.)

SAVE

Note: To provide access to both Admin and App, you will need to create separate Admin User and Observer profiles.

4a Add Species

Species you plan to observe need to be added to your configuration. (Note: ZooMonitor downloads with a number of common species already listed).
